

Also included with the SkyLab Extreme kit:

**Filling Hose / Launcher**

Lets you pump up the rocket from a safe distance away. Releases automatically when you stop pumping.

**Guide Rod**

Keeps your rocket pointed up until it's going fast enough to continue on straight up.

**Safety Marker**

Ensures that the launch site is clearly visible to all.

**Clear pictorial instructions**

Makes the rocket easy to assemble, a breeze to launch.

**Requirements:**

- 1 - Bicycle air pump
- 100 ml water
- 1 - 1000' wide open field

Integral closed-cell foam bumper pad for a safe, soft touch-down every time.

# SkyLab Extreme

Water Rocket Kit  
To 300 feet

Included proprietary rocket-profile body minimizes air friction for higher velocity and altitude.

Entire rocket weighs only 60 grams, maximizing both altitude and safety.

Super-light expanded polymer fins instantly fold out and click into place.

Shock-absorbing mounting system for maximum reusability.

Recessed reduction-type nozzle for long-lasting thrust, impressive vapor trail, and higher altitude.

Low-friction guide tube keeps the rocket pointed up during liftoff.

Reasonably priced spacecraft for the home, school or office.
